

SterilizTM

SMARTER LIGHTSM

About

Steriliz's concentration is in ultraviolet light technology with the specific goal of developing area and surface disinfection methods and processes that are science based, quantitative, and traceable. In addition, Steriliz has collected a significant amount of clinical data and has developed unique data analysis techniques which provide closed loop feedback and management information for infection control practitioners.

The R-DTM Rapid DisinfectorTM delivers lethal Ultraviolet C (UV-C) light doses into complex environments, destroying viruses, spores and drug-resistant bacteria—even in a room's shadowed areas. Its unique, patent pending wireless remote challenge device UV-C sensors make R-D the only system that can measure how much UV-C energy is actually delivered to targeted areas of a treatment space

The R-D is the only UV-C disinfection system that:

Measures
